

Heating system need a little work?

Winter's here — is your furnace up to the challenge? Perhaps that old equipment is still working, but at a high cost for both the environment and your bottom line.

Whether your church needs to address deferred maintenance, improve its environmental friendliness, or expand to accommodate more ministry, a loan from the Cornerstone Fund can help. With flexible loans at competitive rates — including the new EcoLoan and Revolving Line of Credit — a Cornerstone Fund loan can warm up your church's winter.
